

Publication of Conference Proceedings

The publishers of *Magnetic Resonance in Chemistry* (Wiley) have agreed to use one of this year's issues for papers submitted as part of the Cardiff RSC ESR Conference. Quality and refereeing standards will be the same as for any individual submission to this journal. If there are sufficient papers of good quality to fill one issue, then that issue will be dedicated solely to the RSC ESR Conference. Fewer papers will mean sharing an issue with normally submitted articles.

This year's Bruker Lecturer, Ron Mason, has agreed to write a mini-review for the issue. The topics of papers should be in line with the normal subject matter of the journal, and hence involve applications of EPR spectroscopy to chemistry (physical, organic, inorganic), biochemistry, medicinal chemistry or materials chemistry.

For information to authors, please visit

<http://www3.interscience.wiley.com/journal/117935720/grouphome/ForAuthors.html>

Articles can be submitted to the journal at any time, and in the covering letter authors should indicate that they wish the article to be considered for publication in the special issue. The absolute deadline for submission will be 1 July 2010, but earlier submission will be much appreciated. However, authors should indicate their intention to submit an article whilst at the conference, or before.
